## “How to Sell Your Ebook Locally for Big Profits and with NO Competition!”

### Do You “Internet Market” too?

If you have been online for any amount of time, then you have heard it time and time again that “you NEED to have your OWN product”! So if you have your own website of some sort in a specific niche, then you should create an information product that you own 100% rights to.

This way, the “gurus” explain, you can earn 100% of the profits! Sounds great right? Well, let’s say you have decided to write your own Ebook on a niche topic that you are an expert in, and then your going to sell it from your website for \$17-\$47 bucks a pop.

Sounds like the ultimate dream of working from home doesn’t it?

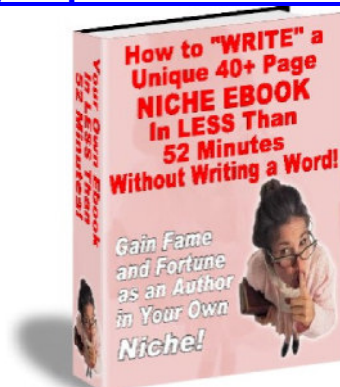

What’s the problem then? Well, most online marketers that I am in contact with, STRUGGLE just to make a few sales each month, IF ANY, for their niche ebook!

**NOTE:** Maybe you haven’t written your own Ebook yet, and don’t know what to do first. If that’s the case, please take a moment to see my previous Special report, **“How to Write a Unique 40+ Page Niche Ebook in LESS Than 52 Minutes Without Writing a Word!”** In it, you learn the step-by-step method I took to create a niche ebook in less than 52 minutes and then turn around and use the system you are about to learn right now in this Report to start making a profit from the ebook in my own local area!

HERE’S A **25% OFF DISCOUNT LINK** TO GET IT RIGHT NOW:

## **“How to Sell Your Ebook Locally for Big Profits and with NO Competition!”**

I suggest you read through that Special Report FIRST to learn how to uncover a niche and then create your very own Ebook. Once you have finished those steps, come back to this report to continue. If you already have your own niche ebook, then you'll really enjoy what you're about to learn in the next few pages!

### **Is there another WAY?**

If you would like to make some money in your local area without going out and doing face-to-face selling, then this program is for you.

Your local businesses are always looking for a way to get their message in front of new prospects. They spend tons of money on advertising and to be truthful most advertising falls way short of expectations.

It either does not “pull” enough business or it is too expensive to be profitable. Ads in newspapers, radio, TV are short lived and expensive. Also these types of ads are read or heard by a lot of people that are not in the market for that specific business product or service right now.

For some businesses, the Yellow Pages advertising is a “must have”, but it is expensive. The good thing at least is that a prospect who picks up the Yellow Pages is **ACTIVELY** looking for a particular product or service. It's obvious that a business has a lot better chance of gaining a customer if that person is in the market for their products.

Now, what if there was a way to target just the specific type of prospect that the business wants, and all those prospects were in the local area? What if the business owner didn't have to pay unless the prospect was looking for that particular product or service and THEN read their ad?

**Wouldn't that be the ultimate in Target Marketing?  
That would be advertising dollars well spent.**

There are a number of ways to do this, but of course, I believe my way is the best. Using my system, the businesses only reach people that are interested in and are actively looking for their type of products and services right now!

Before we get to the details, let me ask you a question . . .
